

Northern Arizona Healthcare

— & CANCER CENTERS OF NORTHERN ARIZONA HEALTHCARE PRESENT —

NAVAJO NATION USA

Feb. 4, 2025, 4:30-7:30 p.m.

Flagstaff Medical Center – McGee Auditorium

Join us for a screening & discussion of the film Navajo Nation USA.

In the Navajo Nation, life can be beautiful, but dangerous. From 1944 to 1986, 30 million tons of uranium was extracted, leaving a legacy of cancer-causing uranium in 524 abandoned mines.

Join us on World Cancer Day to view the film and engage in a discussion with its filmmakers and medical experts from Cancer Centers of Northern Arizona Healthcare.
