

Join us for a day of robotic demonstrations and operate a medical robot yourself!

Northern Arizona Healthcare will soon offer new capabilities in cancer diagnostics, thanks to a lung biopsy robot from Intuitive Surgical, the Ion System. The Ion System will help provide early diagnosis of lung cancer, which can then allow earlier treatment at a potentially curable stage.

You can see the Ion robot in action -- and test it yourself -- during a full-day demonstration at Flagstaff Medical Center.

Attendees can also try using a model of NAH's da Vinci surgical robot, which helps adapt numerous surgeries into minimally invasive procedures.

Thursday, April 23

Flagstaff Medical Center | 1200 N. Beaver St., west campus parking lot

8 a.m. - 10 a.m.

Physicians and other providers
Hosted by Pulmonologist Bethany Weiler, MD

10 a.m. - noon

Coffee with Caregivers
Invite-only, hosted by Office of Philanthropy

Noon - 5 p.m.

NAH colleagues, medical providers, local media, community members and students are welcome to attend this open house session.
